The departments of Orthography and Etymology are made sufficiently full, and their principles are illustrated by a great variety of examples. Oral Exercises, Exercises for Parsing and for the Correction of Errors, are introduced in their appropriate places, under each part of speech. The Syntax contains all the essential distinctions found in the Analysis, but differently arranged, and less rigidly and technically set forth. In the presentation of a subject like that of English Grammar, the first question which naturally arises is that of the point of view from which it shall be examined. Shall the forms of language be regarded as direct results from thought, as the offspring of an inner impulse? or shall they be looked upon as possessing in themselves, regardless of their origin, all that is necessary to guide to a successful investigation? The one may be called the interior, the other the exterior, point of view. From the one point, language is regarded as organized under the influence of a vital, life-imparting power, determining all its outward forms and manifestations; while from the other it becomes a lifeless frame, to be dissected and examined, for the purpose of ascertaining what it is, and of what it is composed.
