## PALEY GRAPHS AND THEIR GENERALIZATION

DOWNLOAD

LAP Lambert Academic Publishing. Paperback. Book Condition: New. Paperback. 52 pages. Dimensions: 8.7in. x 5.9in. x 0.1in. To construct a Paley graph, we fix a finite field and consider its elements as vertices of the Paley graph. Two vertices are connected by an edge if their difference is a square in the field. We study some important properties of the Paley graphs. In particular, we show that the Paley graphs are connected, self-complementary, and symmetric. Also we show that the Paley graph of order  $q$  is  $(q-1)/2$  regular, and every two adjacent vertices have  $(q-5)/4$  common neighbors, and every two non-adjacent vertices have  $(q-1)/4$  common neighbors. In other words, the Paley graphs are strongly regular with parameters  $(q, (q-1)/2, (q-5)/4, (q-1)/4)$ . Paley graphs are generalized by many mathematicians. We give three examples of these generalizations and some of their basic properties. We also define a new generalization of the Paley graphs, in which pairs of elements of a finite field are connected by an edge iff their difference belongs to the  $m$ -th power of the multiplicative group of the field, for any odd integer  $m \geq 1$ , and we call them the  $m$ -Paley graphs. We show that the  $m$ -Paley graph of order  $q$  is complete iff  $\gcd(m, q-1) = 1$  and when  $d = \gcd(m, q-1) > 1$ , the  $m$ -Paley graph is  $(q-1)/d$  regular. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
