Excerpt: . . . was commanded by Hercules to exert himself to raise his wagon from the pit, he placed his shoulder against the wheel, and drawing his body up into a crouching attitude whereby all his joints were flexed, and making his feet the fixed points, by a powerful muscular effort he straightened the toggle joints of his limbs, and the wheel was raised from its bed of miry clay. His horses at the same moment extending their joints, the heavily laden wagon was carried beyond the reach of farther detention. CHAPTER VII. PHYSIOLOGY AND EFFECTS OF EXERCISE. 154. After what has been said of the circulation of the blood and of muscular action, the reader may be prepared to understand a few remarks upon the close connexion and the great influence of the two upon each other, and to follow us in a few deductions on the importance...

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
