Reviews

It is straightforward in go through easier to recognize. I actually have study and that i am sure that i will going to study yet again again down the road. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Not illustrated. 1908 Excerpt: .serum showed an average agglutinative power of 1-262. of virus pigs treated by virus haviug a common origin. We therefore believe that these cultures originated, in the original virus and not in aii alleged normal habitat in the pig s intestine. We believe that the relation of B. cholerae suis to the porcine organ ism and to the filterable virus, and all the interrelation of these three factors in the production of a swine disease should be settled. A scientific understanding of hog cholera is impossible without this solation. The economic problems involved in the production of the Dorset Niles serum or any other biological therapeutic agent for hog cholera, and the sanitary police control and eradication of this disease demand it. The writer is not interested in a controversy over the merits of the different claims as to the etiologic significance of a non-cultivable, virus or a microscopic, cultivable virus for hog cholera. It is only wished that the matter may be placed beyond the stage of controversy. 1. Studies of agglutination reactions in hog cholera during the process of serum production (Prcliminarv). Tech. Bui.
