

A Revised Managers Handbook for Red Pine in the North Central Region

By Daniel W. Gilmore

CreateSpace Independent Publishing Platform. Paperback.

Book Condition: New. This item is printed on demand.

Paperback. 62 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. Red pine (*Pinus resinosa* Ait.), also known as Norway pine has been the most widely planted species in the Lake States region of North America over the past 70 years. As a result, the red pine cover type in the Lake States has increased more than fivefold to almost 1.9 million acres. Because of its widespread occurrence and economic value, red pine has long received close attention from researchers and forest managers. In 1914, Theodore S. Woolsey, Jr., and Herman H. Chapman published a 42-page U. S. Department of Agriculture Bulletin entitled, Norway Pine in the Lake States. This early management guide, based on careful observations and measurements by field foresters, served as the primary guide for managing red pine stands for more than 30 years. During the latter two-thirds of the 20th century, employees of the USDA Forest Service, State governments, universities, the Canadian government, and others established long-term studies of red pine. As measurements and results from these studies became available, red pine guides were periodically revised and updated. Most of these guides...
