

A short course in the theory of determinanats

Filesize: 7.6 MB

Reviews

Basically no phrases to describe. I was able to comprehend everything out of this published ebook. You can expect to like the way the author compose this ebook.

(Mrs. Novella Will)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: . . . D is called the discriminant of the given quadratic function, $ax^2 + by^2 + 2hxy$. The required conditions may now be stated as follows: The linear factors of a homogeneous quadratic function of two variables are real and unequal, real and equal, or imaginary, according as the discriminant of the function is less than, equal to, or greater than zero, respectively. The same conditions determine the nature of the binomial factors of the complete quadratic function of a single variable, viz. : $ax^2 + 2bx + c$, as may readily be seen by making $y = 1$ in the preceding case. 50. Let us now determine the condition which must be fulfilled in order that a homogeneous quadratic function of three variables may be resolved into two rational linear factors. Every such function may be written in the form $ax^2 + by^2 + cz^2 + 2fyz + 2gzx + 2hxy$. Placing this equal to zero and solving for x gives $x = \frac{-(hy + gz) \pm \sqrt{(h^2 - ab)y^2 + (g^2 - ac)z^2 + 2(hg - af)yz}}{2a}$ (1) If the quadratic function under the radical in the second member of this equation is a perfect square, the given function can be resolved into two rational linear factors. By the preceding article, the condition that the quantity under the radical may be a perfect square is This equation expresses the required condition. The determinant in the left-hand member may however be transformed into a simpler and more symmetrical form. Thus: In the same manner we may deduce for the required condition either 0. . (4), (5) In order...
